

S-OIL GREASE MP/EP

Multipurpose extreme pressure grease

Applications

- O S-OIL GREASE MP is a true multipurpose lubricant grease used in automotive and general industrial applications except on high-load or shock-loading applications, formulated to offer the best lubrication performance within - 20°C~130°C.
- O S-OIL GREASE EP is a multipurpose extreme pressure lithium grease extensively used for industrial applications, including high-load and high-shocking automotive and marine applications.
- O S-OIL GREASE EP 000, 00 and 0 are formulated primarily for intensive greasing applications on transfer pump onboard concrete pump car.

Advantages

- O Excellent mechanical stability and shear stability minimizes penetration variation even after rigorous operation.
- O Excellent oxidation stability prevents hardening or deposition even in continued use at high temperature or long-term storage.
- O S-OIL GREASE EP contains a special extreme pressure additive, which improves load-bearing performance significantly and prevents disruption of the lubrication film even when subject to shock loads.
- O Formulated specifically to provide sufficient resistant against washout caused by contact with moisture, preventing corrosion of the bearing surface because of mixing of water.

Specifications

- O KS M 2130
- ISO L XBCDA (S-OIL GREASE MP)
- ISO L XBCFB (S-OIL GREASE EP)
